

Invitation to Murcia Workshop on Context Information Management

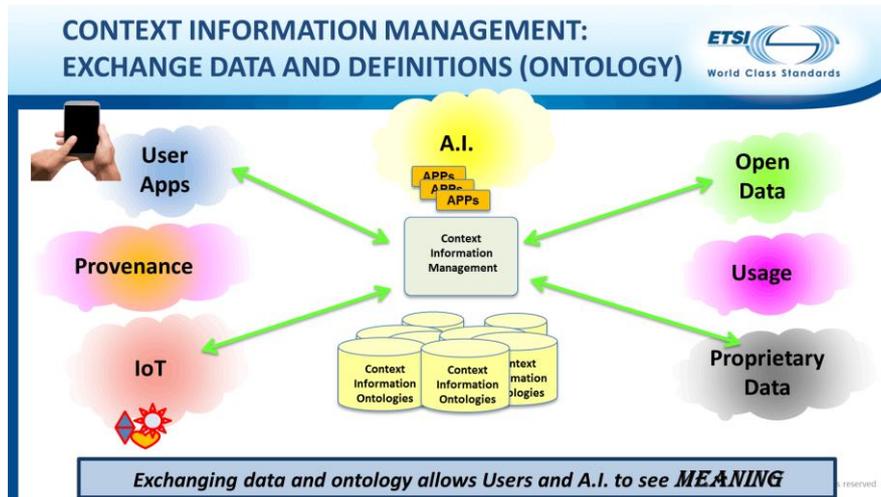

ETSI ISG CIM is organizing with the assistance of HOP Ubiquitous, Instituto de Fomento de la Region de Murcia, Odin Solutions, Computer Sciences Faculty - Universidad de Murcia and CITIZEM a short workshop in Murcia (Spain), to discuss the NGS-LD API specification and its potential applications in cross-domain exchange of context information. A copy of the draft API is available for public comment here: <https://docbox.etsi.org/ISG/CIM/Open>

The workshop uses only publicly available material, without confidentiality guarantees or expectations. The convener of the event is the Chairman of ETSI ISG CIM, and the local host is the company HOP Ubiquitous. Only registered guests may attend, up to a maximum of 20 (twenty) persons. No fees of any kind apply.

Please contact Dr. Lindsay Frost, Chairman of ETSI ISG CIM, cim@neclab.eu if you wish to attend.

Murcia Workshop on Context Information Management	
Date/Time	Tuesday 20th March 2018, 10:00 - 13:30
Agenda	<ul style="list-style-type: none"> • Invited talk "Murcia as a Smart City" by Teodoro García (Deputy for Murcia in the National Congress) and Pablo Cano (Project director at UCAM). • Invited speech "Smart Destinations: ETSI ISG CIM and context-based solutions at tourism sector" by Antonio Jara (HOP Ubiquitous CEO). • Invited talk "MiMurcia Project" by José Martínez Márquez and José Guillén (Murcia City Council). • Invited talk from Computer Science Faculty "IoT, Open Data, Security" by Juan Antonio Martínez, Ph.D. (Research Project Coordinator at Odin Solutions and Lecturer at University of Murcia). • Introduction to ISG CIM NGS-LD API and Information Model. • Stakeholders roundtable by CIOs from relevant cities in Murcia (Murcia, Lorca, San Javier, etc.). • Technical roundtable: <ul style="list-style-type: none"> ○ Practical issues found in modelling and interworking (what works, what does not?) ○ Does ISG CIM NGS-LD API solve the issues, or are changes needed?
Who should attend	Open data experts, IoT developers, technical managers from smart city projects. Only registered guests may attend. No fees of any kind apply.
Location	Computer Sciences Faculty at University of Murcia, Campus de Espinardo, 30100, Espinardo, Murcia, Spain Map of location
Contact	Dr. Lindsay Frost, Chairman, ETSI ISG CIM, cim@neclab.eu
Background Info	https://docbox.etsi.org/ISG/CIM/Open

ETSI established in February 2017 an Industry Specification Group for Cross-cutting Context Information Management (ISG CIM) to issue technical specifications to enable interoperable software implementations for Context Information Management. It is about bridging the gap between abstract standards and concrete implementations, especially for use cases related to Smart Cities, but also to be extended later to Smart Agrifood and Smart Manufacturing.

The work should enable applications to discover, access, update and manage data and context information from many different sources, such as from municipal databases, (mobile) user applications or IoT-systems, as well as to publish it through interoperable data publication platforms, in particular Open Data platforms.
